

## Palletizing KeyKeg 20

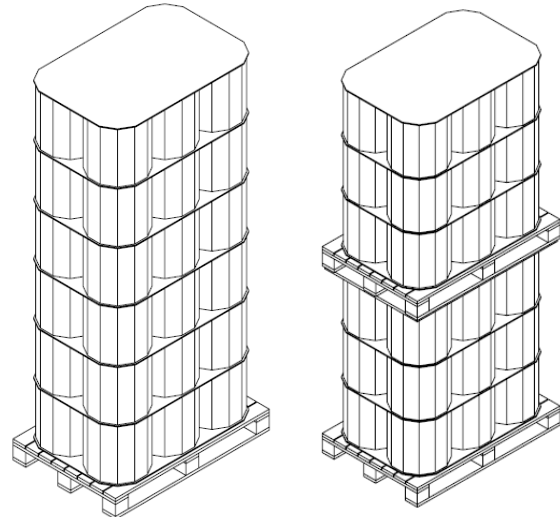

Standard palletizing of empty  
KeyKegs ex-works SAS  
Schwerin:

- One-way Euro pallet (1200x800) or CP5 pallet (1140x760).
- CP5 is best fit in container
- 6 layers, 6 KeyKegs per layer, each layer separated by 7 mm cardboard intermediate sheets incl. top/bottom sheet.
- KeyKegs are stacked bottom up.
- Shrink wrapped in PE foil
- Total height: 2.45 m.

Stacking advise filled KeyKegs:

- 6 layers per pallet maximum (total height per pallet 2.45 m).
- Maximum stacking height in warehouse: 12 layers
- Use of 7 mm cardboard intermediate sheets and top sheet.
- Shrink wrap pallets and/or use straps for every layer.
- If stacking 2 pallets: use rigid wooden sheet (15 mm minimum) below second pallet or use double deck pallets to avoid damage to upper KeyKeg layer of lower pallet.

Rigid wooden  
sheet
